- **Databases:** MongoDB, MySQL
- **Frameworks and Libraries:** Springboot, ExpressJS, ReactJS, NodeJS, NextJS, Bootstrap, TailwindCss
- **Development tools:** Git, Github, Postman, Netlify, Docker
- **Others:** Agile Methodologies, RESTFUL APIs, Jest, ElectronJS, Apache Kafka, Microservices

## WORK EXPERIENCE

**Concentrix Technologies - Halifax, NS**

**Jan 2022 – Aug 2023**

**Technical Advisor – II**

- Troubleshoot and resolve complex technical issues related to hardware, software and networking.
- Promptly respond to customer inquiries and maintain accurate records of all requests and resolutions.
- Successfully juggled and prioritized multiple tasks, demonstrating adaptability and flexibility in a dynamic work environment.

## PROJECTS

**RateHub** (ReactJS, Redux Toolkit, Javascript, RestAPIs)

- RateHub is a movies/tv shows rating web application an attractive UI/UX design.
- Integrated “The Movie Database’s” real time API to get the data of more than 50,000+ movies and tv shows.

**Shoppe.** (ReactJS, Javascript, RestAPIs, Redux, NodeJS, ExpressJS, MongoDB, Mongoose)

- Created an engaging and user-friendly ecommerce web application that seamlessly integrates with the admin panel for a cohesive shopping experience.
- Developed an intuitive and efficient admin panel enabling seamless addition of products with comprehensive access to all store products and user information.
- Implemented a robust user authentication system utilizing NodeJS, ExpressJS, and Mongoose for enhanced using Jsonwebtoken for streamlined and secure user authentication.
- Utilizes Stripe's API to facilitate secure and efficient payment processing during the checkout process.

**Chattify AI** (ReactJS, Javascript, RestAPIs, NodeJS, ExpressJS, GPT 3.5)

- This project is a React application that implements a chat interface powered by the OpenAI GPT 3.5 model.
- This React application provides a user-friendly chat interface that allows users to interact with the OpenAI GPT model through text input or speech recognition and acts as a middleware between clients and the OpenAI GPT model, allowing clients to send messages and receive responses generated by the AI model.
