WORK EXPERIENCE

Truverus - Halifax, NS

May 2024 – Present

Full Stack Developer

- Creating and maintaining robust and scalable applications using MySQL, Express.js, React, and Node.js. Implementing TypeScript for both frontend and backend development to improve code quality, maintainability, and scalability.
- Building and integrating RESTful APIs with Express.js, handling middleware integration and route management.

Concentrix Technologies - Halifax, NS

Jan 2022 – Aug 2023

Technical Advisor – II

- Troubleshoot and resolve complex technical issues related to hardware, software and networking.
- Promptly respond to customer inquiries and maintain accurate records of all requests and resolutions.

PROJECTS

Chattify AI (ReactJS, Javascript, RestAPIs, NodeJS, ExpressJS, GPT 3.5)

- This project is a React application that implements a chat interface powered by the OpenAI GPT 3.5 model.
- This React application provides a user-friendly chat interface that allows users to interact with the OpenAI GPT model through text input or speech recognition and acts as a middleware between clients and the OpenAI GPT model, allowing clients to send messages and receive responses generated by the AI model.

Shoppe. (ReactJS, Javascript, RestAPIs, Redux, NodeJS, ExpressJS, MongoDB, Mongoose)

- Created an engaging and user-friendly ecommerce web application that seamlessly integrates with the admin panel for a cohesive shopping experience.
- Developed an intuitive and efficient admin panel enabling seamless addition of products with comprehensive access to all store products and user information.
- Utilizes Stripe's API to facilitate secure and efficient payment processing during the checkout process.
