Experience

Full Stack Developer

MyCouponbook

Sep. 2024 – Present

Halifax, NS

- Engineered a full stack production-grade payment and subscription system using **Django, React, Typescript, PostgreSQL**, and the **Braintree payment gateway**, supporting recurring billing, one-time payments, secure card vaulting, duplicate payment prevention, and Celery-based async webhook processing.
- Architected a Points Allocation System using **Django, React, Typescript, and PostgreSQL**, enabling businesses to review and manage customer reward requests through real-time polling for 200+ active users.
- Designed and implemented a rule-based promo code system supporting percentage and flat discounts, subscription billing-cycle limits, location-restricted eligibility, product-specific validation and usage tracking
- Implemented **CI/CD** pipelines using **Docker, GitHub Actions, AWS EC2, Nginx** and **Amazon S3**, automating frontend and backend deployments while improving deployment reliability and development consistency.

Full Stack Developer (Internship)

Truverus

May 2024 – Sep. 2024

Halifax, NS

- Built and integrated RESTful APIs using **Node.js** and **Express.js**, implementing middleware, routing, and backend functionality for user management and data handling.
- Designed responsive, interactive UI components in **React** and **TypeScript**, leveraging hooks and advanced state management patterns to improve cross-device usability.

Technical Advisor II

Concentrix Technologies

Jan. 2022 – Jul. 2023

Dartmouth, NS

- Resolved hardware, software, and networking issues for enterprise clients, handling 100+ monthly cases with consistent above-average first-contact resolution.
- Performed deep troubleshooting of OS-level, application, and network-related issues, including performance degradation and device setup failures.

Projects

AWS Cloud-Native Job Tracker App | React, Python, Django, PostgreSQL, AWS (EC2, S3, CloudFront) (May 2026)

- Designed and built a decoupled 3-tier cloud architecture, implementing independent CI/CD pipelines via **GitHub Actions** to deploy containerized backend services on **AWS EC2** and a **React** frontend on **S3** with CloudFront CDN.
- Containerized and deployed **Django** and **PostgreSQL** using **Docker Compose** on **EC2**, configuring **Nginx** as a reverse proxy to enforce secure access, handle SSL/TLS termination, and integrated **Let's Encrypt** for HTTPS encryption.

Chattify AI | React, Node.js, Express.js, OpenAI GPT-3.5

(Mar. 2024)

- Developed a real-time AI chatbot using **OpenAI GPT-3.5**, enabling dynamic and context-aware conversational responses.
- Implemented speech-to-text via react-speech-recognition, enabling hands-free voice interaction alongside standard typed input.

Technical Skills

Languages: Python, JavaScript, TypeScript, Java, HTML/CSS

Frameworks & Libraries: SpringBoot, React, Next.js, Node.js, Express.js, Django, Redux, TailwindCSS,

Databases: PostgreSQL, MySQL, MongoDB

Cloud & DevOps: AWS (EC2, S3, Lambda, RDS, Cloudwatch) Docker, GitHub Actions, Terraform, CI/CD

Tools & Testing: Git, Postman, Jest, Pytest

AI-Assisted Development Tools: ChatGPT, Claude, Cursor

Certifications: AWS Certified Cloud Practitioner

Education

Nova Scotia Community College

Post Graduate Certificate, Full Stack Application Development

Halifax, NS

Sep. 2023 – May 2024

Mount Saint Vincent University

Diploma, Business Administration

Halifax, NS

Jan. 2020 – Dec. 2021
